SEEDLINGS

Let the two pictures to the right be a warning to all you seedling growers. The top scene shows Walter and Sophia Baum in their seedling patch. These are blooming size. The bottom shows a small portion of the new seedlings in various stages of growth.

Seedlings are not all that the Baums grow. In addition to these there are approximately 1,000 other hibiscus plants growing in containers in their back yard. 'Back Yard' - there is none. 'Tis all hibiscus. If you get down North Miami Beach way stop in and see for yourselves. Just go by 17503 NE 6th Avenue.
